Comments 1:

Cannot determine composition. No focal point.

Comments 2:

Cherry blossoms against blue sky projected on the trunk

Comments 3:

I do like the flowering fruit branch, a very creative attempt.

Comments 4:

Compatible composite. No obvious message. Try to increase impact.

Comments 1:

Beautiful colours. Texture interesting. Well-balanced composition. Dark shadows at centre distracting.

Comments 2:

Lovely painting technique/composition; problem is the background has the same detail as foreground – possible to apply separately and then combine

Comments 3:

Such pretty vibrant colours.

Comments 4:

Separating two images improves the photo

Comments 1:

Dramatic effect. Colour chosen suits subject. Would have preferred a slightly looser crop.

Comments 2:

Wood stock on wood grain bckgrnd; eyes – effective. Interesting overlay

Comments 3:

I like the crop on this image.. the tight crop is perfect to isolate the subject. Very interesting processing. I like the wood effect and the saturated yet minimal colour.

Comments 4:

The stare and the gun cause a stir in any reality. Like the mail slot shape. Works well with gun profile.

Beautiful selection of colour. Nice composition. Well balanced. Not sure of the added value of the lines on the left.

Comments 2:

Batik with mystery woman; mood/atmosphere

Comments 3:

Very nice. I like the processing. I would like to see more of the bow or less.. If they are looking toward their prey, I would prefer to see the bow raised and ready..

Comments 4:

Leaves you wondering what the other object is. A bow? Why?

Comments 1:

A potentially interesting nature shot (if zoomed in) but added colours is distracting. Halo around sky.

Comments 2:

OK, unreal but why? Too near reality to be challenging. A puzzle with no apparent purpose?

Comments 3:

Comments 4:

The altering is initially difficult to discern. It looks more like a bad photo than a creative image.

Comments 1:

Good try. But the visual design does not work. Not fully balanced. A bit off centre.

Comments 2:

Artfully imperfect symmetry – not simply computer generated

Comments 3:

I like the repeating butterflies around the "circle", gives the image some movement.

Comments 4:

The subject (butterflies) and the colour creates immed. Impact. Random placement might have been better.

Comments 1:

Dramatic effect. Weird choice of colours for bird. Would have worked with natural colours on B&W.

Comments 2:

Colourful bird in b&w setting – why without being interesting

Comments 3:

I like the altered colours of the bird, and it really stands out against the b/w background.

Comments 4:

Good concept. Degree of altering is minimal. To improve, move wing tips away from branches.

Well balanced. Pleasing SW colours. A bit static. What's the point? What are you trying to achieve?

Comments 2:

Arches Monument as seen by a termite in a fossil tree? Too much computer?

Comments 3:

The blue and terra cotta tones work well together. Interesting kaleidoscope.

Comments 4:

Good initial impact. Sharp and clean. The open circle draws you in, looking for reality, which you have altered.

Comments 1:

Natural subject subjected to an interesting effect. The borders focus your attention on the subject and add some dynamic tension.

Comments 2:

Violating rules: the focus is at the centre; OK use of the computer?

Comments 3:

Nice vibrant colours. I like the centre focus and the repeating colours around the edges.

Comments 4:

Very good. Nice balance of colours. Causes viewer to question "how was that done"?
